PROFILE

Technical Product Manager with an MSc in Artificial Intelligence and a technical range spanning from full-stack development to data and analytics. End-to-end ownership of internal and customer-facing products, including data pipelines, analytics dashboards, APIs, and user interfaces. Keen interest in AI-driven technologies, including AI agents, LLMs and machine learning, and their transformative applications across industries. Adaptable and effective across cross-functional teams.

WORK EXPERIENCE

Tendable

Oct 2024 – Jul 2026 | London, UK

Technical Product Manager | Oct 2025 – Jul 2026

- Led delivery of a major data-infrastructure project on Google Cloud Platform with BigQuery alongside DevOps, optimising analytics feature performance and eliminating query timeouts, cutting data retrieval from minutes to seconds.
- Improved customer retention by driving analytics enhancements across core React dashboards, strengthening the value of the product at renewal.
- Developed comprehensive technical documentation across key features and entity relationship diagrams, giving the team a shared, consistent understanding of an evolving product architecture and accelerating developer onboarding.
- Reduced long-standing product debt by defining clear acceptance criteria for new features and resolving persistent bugs that had affected customers over an extended period.
- Led features end to end from documentation and technical design through React implementation and testing against use case scenarios, delivering robust and well-understood functionality.

Associate Technical Product Manager | Apr 2025 – Sept 2025

- Designed and delivered a customer health-monitoring tool in Metabase that surfaces account activity and engagement, helping support renewal conversations.
- Took end-to-end ownership of the customer-facing product, building responsive frontend interfaces with React and Tailwind CSS and integrating external REST APIs on the backend to power key features.
- Built an automated workflow to convert legacy system data structures into the new platform's format, supporting product demos, faster releases, and migration of existing content with minimal manual effort.
- Improved engineering quality and maintainability by adopting established design patterns, enforcing type safety and linting, and introducing unit testing with Vitest across the codebase.

Data Analyst | Oct 2024 – Mar 2025

- Developed and maintained analytics dashboards on Metabase and Amplitude providing real-time insight into feature adoption and engagement and enabling data-driven decisions across product and other teams.
- Increased customer engagement by implementing targeted messaging campaigns on OneSignal, exporting and filtering subscription data via API to build tailored segments and deliver more relevant, personalised communications.
- Created customer-facing charts in React that turned complex data into accessible, high-impact customer insights.

OTE – Deutsche Telekom Group

Jun 2023 – Jul 2023 | Athens, Greece

Full Stack Development Intern

- Developed an AI-powered CV-screening application using OpenAI Embeddings and GPT-4 with a Vue.js frontend, streamlining the processing of candidate applications.
- Implemented backend functionality in Python/Flask, handling JSON HTTP requests and responses and building database models.

Accenture

Jun 2022 – Jul 2022 | Athens, Greece

Application Development Associate Intern

- Developed Angular features for microloan applications and business account opening on the largest Greek bank's website as part of the core development team.
- Collaborated with developers and stakeholders to refine requirements, support delivery, and ensure smooth implementation of banking workflows.

Exeter Entrepreneurship Society

Oct 2021 – May 2022 | Exeter, UK

Python Instructor (ExCode Programme)

- Delivered Python training for students from diverse academic backgrounds, guiding them from fundamentals to writing their own working code.

EY (Ernst & Young)

Jul 2021 – Aug 2021 | Athens, Greece

Frontend Development Intern

- Developed an Angular web application for the Data & Analytics team to manage accounting and actuarial data, audit trails and security and error logs for a large insurance company.
- Coordinated source-control workflows using Git for branching and code management across a collaborative engineering team.

OTE – Deutsche Telekom Group

Jun 2020 – Jul 2020 | Athens, Greece

Data Science Intern

- Analysed key drivers of customer churn to identify the attributes driving customers to switch to competitors, with findings feeding directly into marketing campaigns.
- Developed data-processing and visualisation pipelines in Python using pandas and matplotlib to support statistical analysis and reporting.

EDUCATION

King's College London

Sep 2023 – Aug 2024 | London, UK

MSc Artificial Intelligence – Passed with Merit

Modules: Pattern Recognition, Neural Networks & Deep Learning, Computer Vision, Data Mining, AI Reasoning & Decision Making, Agents & Multiagent Systems, Distributed Ledgers and Cryptocurrencies, Human Computer Interaction.

Dissertation: Enhancing Uncertainty Quantification in Breast Cancer Classification Models Using Conformal Prediction Methods

University of Exeter

Sep 2020 – Jun 2023 | Exeter, UK

BSc Computer Science – Upper Second Class (2:1)

Modules: AI & Applications, Learning from Data, Data Structures & Algorithms, Nature Inspired Computation, Software Development, Database Theory & Design, Computational Mathematics, Enterprise Computing, Object-Oriented Programming, Web Development, Computers and the Internet, Social and Professional Issues of the Information Age, Discrete Mathematics for Computer Science, Computer Languages and Representation, Network and Computer Security, The C Family.

Final-year project: Skin Lesion Classification using Convolutional Neural Networks: A Comparative Study of ResNet, DenseNet, and Xception Architectures

TECHNICAL SKILLS & ADDITIONAL INFORMATION

Engineering: Python, TypeScript, JavaScript, React, React Router, Tailwind CSS, Vue, Angular, Flask, Django, REST APIs, OpenAI API, SQL/MySQL/PostgreSQL, Java, Go, C/C++, Git, Google Cloud Platform, Vitest.

AI/ML: Machine learning, Deep Learning, Computer Vision, TensorFlow.

Languages: Greek (native), English (C2 Proficiency), French (DELF B2), Italian (B1), Spanish (A2).

Interests: Volunteering with "Smile of the Child" NGO; piano (ABRSM Grade 6); basketball; judo (green belt).
